

## WFGP Silver20 Matte

<u>Performance Data</u>	<u>Single Pane</u>	<u>Double Pane</u>
Total Solar Energy Rejection	80%	67%
Solar Heat Gain Coefficient (G Value)	0.2	0.33
Visible Light Transmitted	18%	17%
Internal Reflection	28%	29%
UV Rejection	99%	99%
Glare Reduction	82%	79%

Silver20 Matte window film provides excellent heat and glare rejection to create a more comfortable environment in which to work or relax combined with a frosted internal face for 24-hour privacy.

The exterior silver finish and internal frost layer make it ideal for screening off unattractive parts of a building or views.

### Important Information

Internal application only.

We do not recommend the use of internally installed solar reflective film on Georgian Wired glass or double-glazed units if they are Laminated glass due to the increased risk of thermal fracture.

Polyester film is not suitable for application to plastics or polycarbonates.

**Please Note: the above is given in good faith to provide an indication of the performance of the product. Purchasers should consider the suitability of each product for its intended use, and the purchaser assumes all risks in connection with such use.**
